

INTRODUCTION TO COMPUTER

In this video we have introduced the computer. So first of all what do we mean computer? A computer is an electronic machine. That is. You can learn about outputs, inputs and processes on the computer. And what is CPU? Whatever it is. That is.

le input, control unit, output, arithmetic logic unit (A L U) and memory unit, in C P U. That is.

What are the basic components of a computer like? That is. And you can also know what the basic parts of the computer work.

In the introduction to the computer, we will learn how to work on the computer using the hardware and software components of the computer.

In the next video we will learn about Windows Explorer.

Thank u.
